

LIST OF TABLES

Chapter 1: - Existing population forecasts must be reconsidered

Table 1. - United Nations population forecasts for 2025 in the Mediterranean region and neighbouring countries (medium variant in thousands)

Table 2. - IIASA population forecasts for the Mediterranean region. Central scenario (thousands)

Table 3. - Recent IIASA forecasts compared with the United Nations medium variant (1998)

Chapter 2 - Detailed country-by-country results**MOROCCO**

Table 1. - Historical trend of total fertility rate by female educational level

Table 2. - Projected total fertility rate according to two decline scenarios

Table 3. - Female educational distribution (%)

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Blue Plan 1992

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

ALGERIA

Table 1. - Historical trend of total fertility rate by female educational level

Table 2. - Projected total fertility rate according to two decline scenarios

Table 3. - Female educational distribution (%)

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Blue Plan 1992

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

TUNISIA

Table 1. - Female educational distribution (%)

Table 2. - Historical trend of total fertility rate by female educational level

Table 3. - Projected total fertility rate according to two decline scenarios

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Blue Plan 1992

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

LIBYA

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Blue Plan 1992

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

MAURITANIA

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

EGYPT

Table 1. - Female educational distribution (%)

Table 2. - Historical trend of total fertility rate by female educational level

Table 3. - Projected total fertility rate according to two decline scenarios

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998, Blue Plan 1992 and Yousif and Hammouda 1995

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

SUDAN

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Yousif and Hammouda 1995

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

SYRIA

Table 1. - Female educational distribution (%)

Table 2. - Historical trend of total fertility rate by female educational level

Table 3. - Projected total fertility rate according to two decline scenarios

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998 and Blue Plan 1992

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

LEBANON

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

IRAQ

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

JORDAN

Table 1. - Projected total fertility rate according to two decline scenarios

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998, both banks and East bank only

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

PALESTINE

Table 1. - Projected total fertility rate according to two decline scenarios 1995

Table 2. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998, West Bank, Gaza and East Jerusalem

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

ISRAEL

Table 1. - Projected total fertility rate (whole country and Israeli Palestinians) according to 2 scenarios

Table 2. - Projected total population of Israel and Israeli Palestinians according to 2 fertility scenarios

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only) for A) Total population and B) Palestinian population

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only) for A) Total population and B) Palestinian population

Accompanying Table 3. - Population (thousands) by five-year age group and sex

A) Total population

B) Palestinian population

TURKEY

Table 1. - Female educational distribution (%)

Table 2. - Recent total fertility rate trend by female educational level

Table 3. - Projected total fertility rate according to two decline scenarios

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, UN 1998, Blue Plan 1992, Statistical Institute and T. Unalan

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

YEMEN

Table 1. - Historical fertility rate trend by area and by female educational level

Table 2. - Female educational distribution (%)

Table 3. - Projected total fertility rate according to two decline scenarios

Table 4. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

SAUDI ARABIA

Table 1. - Estimated historical Saudi national population

Table 2. - Projected total fertility rate according to two decline scenarios, fertility and net immigration according to United Nations

Table 3. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios, immigration assumptions and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

GULF PRINCIPALITIES

Table 1. - Recent indicators

Table 2. - Projected total fertility according to two decline scenarios and net immigration according to United Nations

Table 3. - Population size 1995-2025 according to the 2 forecast scenarios, immigration assumptions and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

IRAN

Table 1. - Recent total fertility rate trend

Table 2. - Projected total fertility rate according to two scenarios

Table 3. - Population size 1995-2025 (thousands), according to the 2 forecast scenarios and UN 1998

Accompanying Table 1. - Structure by broad age groups (%) (Variant 1 only)

Accompanying Table 2. - Crude birthrate, mortality, natural increase, migration and total growth (per 1000) (Variant 1 only)

Accompanying Table 3. - Population (thousands) by five-year age group and sex

Chapter 3. - Implications of population growth on the southern shore

Table 1. - Overview: fertility and population (1995-2025)

Scenario 1 (rapid fertility decline)

Scenario 2 (slow fertility decline)

Table 2. - Population ageing on the southern shore of the Mediterranean

Table 3. - Population growth to 2025: two forecasts compared

Table 4. - Growth rate (per 1000) in 2020-2025

Table 5. - Labour force accessions and exits (thousands) from 1995 to 2025

Table 6. - Female participation rate (%), 25-29 years of age -1995-2025

Table 7. - Public spending on education as a share (%) of GNP and total budget. Most recent year

Table 8. - Annual births (thousands) per quinquennial period 1995-2025
